GSW NRW e.V.

Networks for Secure Societies

Who are we?

The **Association of the Security Businesses in North-Rhine-Westphalia** (GSW NRW e.V.) is a network of research institutes and small businesses. The German federal state of North-Rhine-Westphalia plays a key role for the association, but members and organizations from other federal states and adjoining European countries are also represented in our membership. GSW NRW e.V. is a **non-profit organization**.

What are our goals?

The members have committed themselves to support the **"Secure Societies"** in **Europe** (see right) and elsewhere. To be able to do this forcefully it is the association's goal to bring our members together to open up and serve new markets. With their extraordinary skills and capacities our members provide a unique portfolio of research, products and services to the customer. Business ethics are of high importance to all of us individually as well as within the network.

What do we do?

- Based on the "Comprehensive Security Model" as our USP (see left) we try to promote the goals of "Secure Societies" with the various enterprises and research facilities.
- We maintain updated information through regular contact with authorities and business circles.
- To promote our goals we regularly hold at least 2 membership meetings per year covering interesting and topical subjects or special issues as requested by our members. Our Special "Stammtische" (topic orientated clusters) which meet every 2-5 months provide interesting information and

projects. For details on the "Stammtische" see also www.gsw-nrw.de

- The Board of Directors of GSW NRW e.V., the Executive Manager and in very difficult cases also individual members / or senior entrepreneurs assist in solving challenges of all kinds or establishing contacts to local, state or federal authorities as well as to other businesses and networks.

Founding of consortia during the process of project building is supported by GSW through moderation / coaching and specific workshops up to the appointment of the consortium's leader.
